EXAMINER'S AMENDMENT

An examiner's amendment to correct obvious errors appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

1. In line 2 of claim 6, "faster" has been changed to - - fastener - - .
2. In line 2 of claim 7, "faster" has been changed to - - fastener - - .
3. In line 2 of claim 8, "faster" has been changed to - - fastener - - .

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to show a beach lounge chair cover including an elongated cushion inserted between the first and second sheets, the cushion being dimensioned and configured for extending between the head end and the foot end and between the opposing sides of the first and second sheets, the cushion being insertable and removable through the opening in the cover, first and second panels of fabric attached to the second sheet at the head end and the foot end, respectively, in order to define pockets for securely attaching the cover to the beach chair lounge, and a

pillowcase attached to the head end of the first sheet, in combination with other specifically claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The proposed drawing correction to Figure 6, filed June 9, 2004, has been approved.

The formal correction to Figure 6, filed June 9, 2004, is acceptable. The formal drawings (Figures 1-5 and 7-9) are acceptable.

The objection to the drawings under 37 CFR 1.83(a) for failing to show a zipper has been withdrawn. The zipper is provided as an alternative fastener to the shown hook and loop fasteners. Since the zipper is presented as an alternative, and its use is well known in the pertinent art, the objection has been withdrawn.
